EXHIBITION

EBBA KOCH – PIONEERING SURVEY DRAWINGS AND STUDIES OF MUGHAL ARCHITECTURE

The exhibition gives insight into Ebba Koch's extraordinary practice and research methodology with regard to the documentation and analysis of Mughal architecture and culture in India and in Pakistan. The processing of this unique archive – together with the Architect Richard A. Barraud – resulted in the first detailed production of plans of major Mughal monuments.

The exhibition is curated by Christine Bruckbauer and Christiane Kalantari.

This presentation accompanies the symposium: „A Transdisciplinary Approach to Mughal Studies: A symposium in honor of Professor Ebba Koch's scholarly works“.
